

An innovative digital system of care for all Medicaid waived clients.

Clinic@HomeSM

The state of Minnesota is pioneering the use of the Clinic@Home system for its most at-risk citizens.

Clinic@HomeSM is a first of its kind digital system of care that dramatically improves the lives of Medicaid CADI and other waived clients by facilitating better access to essential health and wellness services.

Our solution breaks down barriers to care by enabling waived clients and care teams to utilize services such as hybrid telemedicine and remote patient monitoring (RPM) to dramatically improve medication adherence and create a more stable home environment.

Clients receive a 50" Sony smart TV, with doctor ordered RPM devices such as an automated medication dispenser, contactless thermometer, and pulse oximeter at no cost to them. Together these connected devices enable the care team to monitor client health and clients to manage their health and care services more proactively from the comfort of home. The complete system enables a "hybrid telemedicine" approach, which means our consulting nurse is in the client's home helping with the virtual practitioner visit.

Better care for your clients.

Clinic@Home clients report an improved quality of life and health outlook:

- Receiving wellness visits from a physician 4+ times a year
- Remembering to take daily medications
- Avoiding unnecessary ER visits or hospitalizations

I don't have a car. Leaving the house gives me anxiety, and now I don't have to worry about getting to appointments - I have my appointments right here.

- MARIA, CLINIC@HOME CLIENT

Peace of mind for you.

Case managers report better care and more efficient management of waived clients:

- Keeping clients stable and living at home longer
- Streamlining care coordination
- Using monthly client data reports to better manage care

I have a client with a lot of social anxieties. Clinic@Home has helped them overcome not being able to comfortably go into the community or find transportation... they went from sub-20% adherence to now above 80% with their visits and treatments.

- JENNIFER, IHS PROVIDER

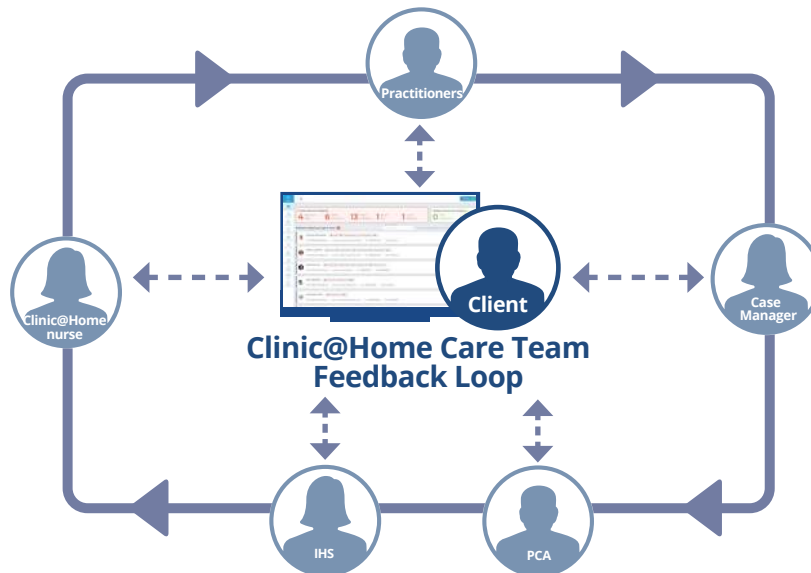

All Minnesota Medicaid waivers cover 100% of the Clinic@Home system.

In under 15 minutes you can change your clients' lives forever

Referring Clinic@Home for your clients takes less than 15 minutes for you to complete the authorization and we can install the platform within 3-5 business days.

- Your clients get full use of a free 50" Sony smart TV, better access to a health care team from the home, and more stability enabling them to stay in the community longer.
- You get the peace of mind knowing you are providing the essential services your clients need and can more easily monitor and manage their care via our monthly feedback loop including client status reports.
