

This two-step checklist will take just three minutes to complete and is to help you identify potential clients for the Clinic@Home system of care.

Case Manager: _____ **Client Initials:** _____ **Date:** _____

STEP 1: CONFIRM ELIGIBILITY

Checking this box indicates your client is eligible for Clinic@Home to be completely covered by the waiver.

Client is a MN Medicaid participant enrolled in any one of the following waiver programs: CADI, DD, BI, EW, AC, CAC (including the CDCS program).

STEP 2: SUPPORT EVALUATION CHECKLIST

Check all that apply.

- Client desires and needs more assistance to be able to continue living independently in the community.
- Client could benefit from collaboration and organization of community and care team supports.
- Client has difficulty managing his or her own healthcare.
- Client experiences transportation challenges that create barriers to accessing needed services and care.
- Client has some challenges with medication pick-up/delivery, organization/dispensing or overall adherence.
- Client recently visited an urgent care facility, emergency room or was hospitalized.
- Client has felt isolated due to fear and anxiety associated with public and social settings.
- Client has struggled with mental and behavioral health.
- Client feels disconnected with parts of the healthcare system due to prior negative experiences.
- Client manages one or more chronic conditions and could benefit from the support of remote monitoring in the home.
- Client could benefit from regular access to scheduled telemedicine services with ongoing home-based training and support.
- Case managers and care team members, including myself, would benefit from regular updates on client's stability in their home.

If you checked three or more boxes in the Support Evaluation Checklist, our experience indicates your client is very likely to benefit from having the Clinic@Home system of care installed in their home.

NOTES

REFER A CLIENT
Based on this checklist, if you feel your client is eligible, please call 888.562.1235 or visit www.healthemed.com to make a referral for services.
